Description of Proposed work

The proposed work entails demolition/encapsulation, construction of a rear addition and exterior alterations to the historic structure. The goal of the proposed work is both to restore the existing historic structure and to provide a noteworthy house fit for contemporary life while respecting the historic portions of the structure and property. The addition to the rear is intended to appear secondary to the historic portions of the structure.

The demolition portion of the project involves removing the non-historic addition to the rear of the house as well as the shed structure and covered parking structure in the rear. The entire structure is to be refaced with 5" reveal wood lap siding and 5/4 x 4 wood corner boards.

The proposed 1919 sq.ft. addition and renovation includes the construction of a two story structure to the rear of the historic portion of the house and the removal of several interior walls from the existing house. Most of these interior walls appear to not be original to the historic house. Furthermore, the massing of the historic portion will be maintained and reflected in the interior layout of the proposed design.

Proposed exterior alterations are intended to restore the historic nature of the house. The original front entry door, which has been moved to the side of the house, will be returned to its original location on the front façade. The historic windows are to be retained wherever possible. Proposed new doors, new windows and lighting all intend to reflect the historic nature of the property, while differing enough in order not to be confused the actual historic portions of the house. The garden courtyard to the west of the historic structure is to be refurbished with new paving, a new fountain and new plantings. A masonry pad in the rear will be provided for on-site parking.
